CUCUMBER

Variety	Flower Habit	Days to Maturity	Plant	Fruit Size (LxD)	Fruit Shape	Disease Resistance/Tolerance	Characteristics
---------	-----------------	---------------------	-------	---------------------	----------------	---------------------------------	-----------------

RESISTANCE is defined as the ability of a plant variety to highly restrict the activities of a specific pathogen or insect pest and/or restrict the symptoms and signs of a disease when compared to susceptible varieties. TOLERANCE is defined as the ability of the plant to endure or recover from damage caused by an adverse environmental or chemical stress.
