Disease Resistance Information

Proposed Code (ISF)	Scientific name	English common name	Spanish common name
XCV Race 0 - 10	<i>Xanthomonas spp.</i>	Bacterial spot	Mancha o sarna bacteriana
Cca	<i>Corynespora cassiicola</i>	Target leaf spot	Mancha anillada del pepino
Ccu	<i>Cladosporium cucumerinum</i>	Scab	Gomosis
CMV	<i>Cucumber mosaic virus</i>	Cucumber mosaic	Virus del mosaico del pepino
Co	<i>Colletotrichum orbiculare</i>	Anthraxnose	Antracnosis
CVYV	<i>Cucumber vein yellowing virus</i>	Cucumber vein yellowing	Virus de las venas amarillas del pepino
Fom races 0,1,2 and 1.2	<i>Fusarium oxysporum f. sp. melonis</i>	Fusarium wilt	Fusarium
Forl	<i>Fusarium oxysporum f. sp. radicle-lycopersici</i>	Fusarium crown and root rot	Fusariosis
Ma	<i>Meloidogyne arenaria</i>	Root-knot	Nemátodos
Mi	<i>Meloidogyne incognita ?</i>	Root-knot	Nemátodos
Mi	<i>Meloidogyne incognita</i>	Root-knot	Nemátodos
Mj	<i>Meloidogyne javanica</i>	Root-knot	Nemátodos
Pc	<i>Phytophthora capsici</i>	Phytophthora blight	Tristeza del pimiento
Pcu	<i>Pseudoperonospora cubensis</i>	Downy mildew	Mildiu
PepMoV	<i>Pepper mottle virus</i>	Pepper mottle	Virus del moteado del pimiento
PRSV	<i>Papaya ringspot virus</i>	Papaya ringspot	Virus de las manchas anulares de la papaya
Psi	<i>Pseudomonas syringae pv. lachrymans</i>	Angular leaf spot	Mancha angular de las cucurbitáceas
PVY 0,1, 1.2	<i>Potato virus Y</i>	Potato Y	Virus Y de la patata
Px Race 1,2, 5,3.5	<i>Podosphaera xanthii</i>	Powdery mildew	Oidio
Ss	<i>Stemphylium solani</i>	Gray leaf spot	Mancha gris de la hoja de tomate
TEV	<i>Tobacco etch virus</i>	Tobacco etch	Virus del jaspeado del tabaco; Virus del grabado del tabaco
TMV	<i>Tobacco mosaic virus</i>	Tobacco mosaic	Virus del mosaico del tabaco
ToMV	<i>Tomato mosaic virus</i>	Tomato mosaic	Virus del mosaico del tomate
TSWV	<i>Tomato spotted wilt virus</i>	Tomato spotted wilt	Virus del bronceado del tomate
TYLCV	<i>Tomato yellow leaf curl virus</i>	Tomato yellow leaf curl	Virus del rizado amarillo del tomate
V	<i>Verticillium albo-atrum</i>	Verticillium wilt	Verticilosis
WMV	<i>Watermelon mosaic virus</i>	Watermelon mosaic	Virus del mosaico de la sandía
ZYMV	<i>Zucchini yellow mosaic virus</i>	Zucchini yellows mosaic	Virus del mosaico amarillo del calabacín

Cucumber - American Slicer Gynoeocious

Anaconda ^{NEW}

- A hybrid Gynoeocious American Slicer that has a strong plant and early fruit set.
- Fruits are cylindrical while averaging 24x4cm (9.5x1.6in) size.
- Disease resistance: Ccu, Cca, CMV, Co, PRSV, Px, WMV, ZYMV

Boa ^{NEW}

- A hybrid Gynoeocious American Slicer that is defined by its vigorous plant and dark green fruit color.
- Fruits are very cylindrical while averaging 21x6cm (8.25x2in) in size.
- Disease resistance: Ccu, Cca, CMV, Co, PRSV, Px, ZYMV

Cobra

- A market leader in Gynoeocious slicing cucumbers
- Attractive dark green color, produces very well on both plastic and open ground production.
- Fruits are cylindrical while averaging 24x6cm (9.5x2in)
- Disease resistance: Ccu, Co, CMV, Psl, Px, PRSV, WMV, ZYMV

Coral ^{NEW}

- A hybrid Gynoeocious American Slicer that is characterized by its vigorous plant and its dark green fruit.
- Fruits are very cylindrical while averaging 24x6cm (9.5x2in)in size.
- Disease resistance: Ccu, Cca, Co, PRSV, Px, WMV, ZYMV

Cucumber - American Slicer Gynoecious

Carmen

- A hybrid Gynoecious American Slicer that is characterized by a very vigorous plant and beautiful dark green fruit.
- Fruits are cylindrical while averaging 23x7cm (9x2.5in) size.
- Disease resistance: ALS, CMV, PRSV, WMV, ZYMV

Superior

- A hybrid Gynoecious American Slicer with excellent fruit quality and a very attractive dark green color.
- Fruits are very cylindrical while averaging 24x6cm (9.5x2in) in size.
- Disease resistance: ALS, CMV, PRSV, WMV, ZYMV

VC19013278 ^{NEW}

- A hybrid Gynoecious American Slicer with excellent uniformity, quality and yield.
- Fruits are very cylindrical while averaging 22x6cm (9x2.5in) in size.
- Disease resistance: In test

Cucumber - American Slicer Monoecious

VC22013131 ^{NEW}

- A hybrid Monoecious American Slicer that has a vigorous plant that produces high quality fruit during the main season.
- Fruits are cylindrical while averaging 20x6cm (8.25x2in) in size.
- Disease resistance: ALS, CMV, PRSV, WMV, ZYMV

Cucumber - American Slicer Monoecious

Señor

- A hybrid Monoecious American Slicer that has a vigorous plant habit and fruit with dark green, attractive and smooth skin.
- Fruits are cylindrical while averaging 21x6cm (8.5x2in) in size.
- Disease resistance: ALS, CMV, PRSV, WMV, ZYMV

Yacumama

- A hybrid Monoecious American Slicer with an extremely strong and vigorous plant that produces high quality fruit during the main season.
- Fruits are dark green and cylindrical while averaging 22x6cm (8.7x2in) in size.
- Disease resistance: Cca, Ccu, CMV, PRSV, Px, WMV, ZYMV

VC19013363 ^{NEW}

- A hybrid Monoecious American Slicer with a vigorous plant and excellent post harvest.
- Fruits are dark green and cylindrical while averaging 22x5cm (8.7x2in) in size.
- Disease resistance: CMV, Co, PRSV, Px, WMV, ZYMV

Cucumber - American Slicer Parthenocarpic

Yukon ^{NEW}

- A hybrid Parthenocarpic American Slicer with a vigorous plant and short internodes.
- Fruits are dark green with smooth, shiny skin, and a small seed cavity will averaging 21x6cm (8.5x2in) in size.
- Disease resistance: Ccu, CMV, CVYV, Px

Cucumber - American Slicer Parthenocarpic

VC21013146 ^{NEW}

- A hybrid Parthenocarpic American Slicer with a vigorous plant and great production.
- The high quality fruits are cylindrical and average 24x4.5cm (9.5x1.8in), with a nice glossy green color.
- Suited for open field and under low tech environments.
- Disease resistance: Cca, Ccu, CMV, PRSV, Px, WMV, ZYMV

VC21013166 ^{NEW}

- A hybrid Parthenocarpic American Slicer that is very productive.
- The uniform fruits are cylindrical and average 22.86x4.5 cm (9x1.8in) in size, with a beautiful glossy green color.
- Suited for open field and under low tech environments.
- Disease resistance: In test

Rufan

- A hybrid Parthenocarpic American Slicer cucumber that is of high quality.
- High yielding and strong resistance package.
- Fruits are dark green while averaging 24x6cm (9.5x2in) in size.
- Disease resistance: CMV, CYSDV, CVYV, Px, Pcu

Cucumber - Beit Alpha Open Field

Perseus

- A hybrid open field Beit Alpha with high quality, dark green fruit.
- Characterized by a prolific plant that produces fruit averaging 15x2cm (5.9x2in) long with impressive green color and ribbing.
- Disease resistance: CMV, PRSV, Px, WMV ZYMV

Cucumber - Beit Alpha Open Field

Sorina

- Early maturing hybrid open field Beit Alpha that exhibits an excellent dark green color. Ideal for the early season.
- The high quality fruits are cylindrical and average 16x3cm (6x1in)
- Disease resistance: CMV, PRSV, Pcu, Px, WMV, ZYMV

Rider

- A hybrid open field Beit Alpha with excellent quality and its portrayed by its distinct ribbing.
- The uniform fruits are dark green and average 15.8x2.7cm (6.2x1in) in size.
- Disease resistance: CMV, PRSV, Pcu, Px, WMV, ZYMV

Hike

- A hybrid open field Beit Alpha that is predominantly female, with high quality, dark green fruit.
- The high quality fruits are dark green and average 16x3cm (6.2x1in) in size.
- Disease resistance: CMV, PRSV, Pcu, Px, WMV, ZYMV

Tayson

- A late maturing hybrid open field Beit Alpha with high quality, dark green fruit.
- Characterized by a prolific plant that produces fruit averaging 15x2cm (5.9x1in) long with impressive green color and ribbing.
- Disease resistance: CMV, PRSV, Pcu, Px, WMV, ZYMV

Hakim

- A hybrid open field Beit Alpha with a vigorous plant while producing a high number of side shoots.
- The fruits mature in the main and late season and average 15x2cm (5.9x1in) long with impressive green color and ribbing.
- Disease resistance: CMV, PRSV, Pcu, Px, WMV, ZYMV

Cucumber - Beit Alpha Open Field

VC21013763 ^{NEW}

- A hybrid open field Beit Alpha cucumber that has an extremely prolific plant with high number of side shoots.
- The high quality fruits are ribbed, 15x2cm (6x1in), with a nice glossy green color.
- Disease resistance: CMV, PRSV, Pcu, Px, WMV

VC21013767 ^{NEW}

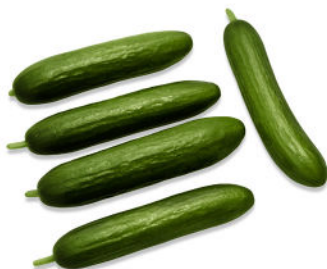

- A hybrid open field Beit Alpha that has an extremely vigorous plant characterized by its ability to produce high numbers of side shoots.
- Main season maturing variety has fruits that are 15x2cm (5.9x1in) long with impressive green color and ribbing.
- Disease resistance: CMV, PRSV, Pcu, Px, WMV

CU18067 ^{NEW}

- A hybrid open field Beit Alpha cucumber with high quality, dark green fruit.
- Characterized by a prolific plant that produces fruit averaging in length 16x3cm (6x1in) in length.
- Disease resistance: In test

Cucumber - Beit Alpha Parthenocarpic

Majd

- A hybrid Parthenocarpic Beit Alpha cucumber that produces excellent quality fruit with high yield potential, ideally for winter slot.
- The dark glossy green fruit are average 17x2cm (6.3-7x2in) in length.
- Disease resistance: CMV, PRSV, Px, WMV, ZYMV

Walladah F1

- A hybrid Parthenocarpic Beit Alpha cucumber that produces excellent quality fruit with high yield potential.
- The high quality fruit are dark glossy green fruit and average 17x2cm (6.3-7x2in) in length.
- Disease resistance: Ccu & Px

Cucumber - Dutch Parthenocarpic

Banglas

- A hybrid white Dutch cucumber that has medium plant vigor producing intermediate internodes for early spring growing season.
- The fruit are cylindrical, uniform, firm, and average 28-30cm (11-12in) in length.
- Disease resistance: Ccu & Px; Intermediate resistance: CVYV & CMV.

Takeshi

- A hybrid Dutch cucumber that has a balanced plant with very early production.
- The fruits have a short and rounded neck, great regrowth and average 30-32cm (11.5-12.5in) in length.
- Disease resistance: CMV, CYSDV, CVYV, Px

Tatami

- A hybrid Dutch cucumber that has a open plant with good ventilation, and it adapts to lower temperature conditions with shorter days.
- Good post-harvest conservation, and it's recommended for plantings from mid-September to mid-October.
- The uniform fruit average 32cm (11.5-12.5in) in length.
- Disease resistance: CMV, CVYV, CYSDV

Cucumber - Pickle Gynoecious

Maxxima

- A hybrid multi-virus Gynoecious Pickle with a vigorous plant habit that produces a high yield.
- The high quality fruits are dark green, while averaging 10.5x4.5cm (4x1.5in) in size.
- Disease resistance: Ccu, Co, CMV, PRSV, Px, WMV, ZYMV

VC19013554 ^{NEW}

- A hybrid multi-virus Gynoecious Pickle with a vigorous plant that produces a uniform, high quality fruit.
- The fruits are dark green, while averaging 8x2.5cm (3.5X1in) in size.
- Disease resistance: Ccu, Co, CMV, PRSV, Px, WMV, ZYMV

Cucumber - Pickle Monoecious

Mega Max

- A hybrid Monoecious Pickle, represents a vigorous plant habit while producing high quality fruit.
- The dark green fruit is small seeded with a thicker skin, while averaging 11x4cm (4x1.5in) in size.
- Disease resistance: Cca, Ccu, CMV, Co, PRSV, Px, WMV, ZYMV

Super Max

- A hybrid Monoecious Pickle that has a vigorous plant habit which matures 40-45 days to first pick.
- It can be cultivated staked or on the ground and ideal for both fresh market and processing markets.
- The uniform dark green fruit average 10x4cm (4X1.5in) in size,
- Disease resistance: Cca, Ccu, CMV, Co, PRSV, Px, WMV, ZYMV

VC19013558 ^{NEW}

- A hybrid Monoecious Pickle that produces a high number of high quality fruits.
- The uniform, firm, dark green fruit has a small seed cavity average 10x4.5 cm (4X1.8in) in size.
- Disease resistance: CMV, PRSV, Px, WMV, ZYMV

Supremo

- A hybrid Monoecious Pickle that is very vigorous and cylindrical, ideal for later productions where lower temperatures are predominant.
- Vigorous plant habit, uniform firm dark green fruit, and small seed cavity.
- Disease resistance: Ccu, CMV, PRSV, Px, WMV, ZYMV

Cucumber - Pickle Parthenocarpic

Panuco ^{NEW}

- A hybrid Parthenocarpic Pickle that is portrayed by its vigorous plant and matures in 40-45 days.
- The uniform dark green fruit are cylindrical and average 10x4.5cm (4X1.8in) in size.
- Ideal for low tech environment.
- Disease resistance: CMV, Ccu, WMV, PRSV, Px

Cucumber - Pickle Parthenocarpic

Fuerte ^{NEW}

- A hybrid Parthenocarpic Pickle that is characterized by its uniform and cylindrical fruit that maintain a nice medium green color.
- The vigorous plant produces fruit averaging 10x4cm (4X1.5in) in size.
- Ideal for low tech environment.
- Disease resistance: Ccu, CMV, PRSV, Px, WMV

VC20013563 ^{NEW}

- A hybrid Parthenocarpic Pickle which produces a high number of quality fruit.
- The healthy plant produces uniform fruit that are 10x4cm (4X1.8in) in size.
- Disease resistance: Ccu, CMV, PRSV, Px, WMV

Eggplant - Tear Drop

Midnight Express

- A hybrid eggplant that has a concentrated set throughout the crop and very high yields.
- The fruit are oval elongated in shape, uniform, glossy dark black in color, and has a green calyx.
- This variety matures very early.

USAEG 23000

- A hybrid eggplant that produces dark purple to black fruit with a green calyx.
- The uniform fruits exhibit excellent quality, high yield, and have the ability to not oxidize.
- Great variety for the most discerning markets.

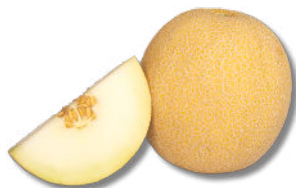

Madrid

- A hybrid oval elongated eggplant that has a vigorous plant with high fruit quality.
- This variety can perform well in days with low luminosity and temperature due to its ease of setting fruit.
- Great for Fall and Spring cycles.

Melon - Galia

VM19015458 ^{NEW}

- A hybrid Galia melon with great plant foliage and uniform fruit.
- The fruit are round-oval in shape, average 2.8-3kgs in weight and have a beautiful green creamy flesh.
- This high yielding melon is best suited Middle East regions.

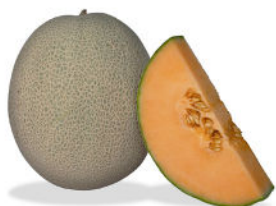

VM21015422 ^{NEW}

- A hybrid Galia melon with a vigorous plant that provides excellent cover and produces a high number of fruit.
- The fruit are uniform, with a super tight cavity, and a green creamy interior flesh color.
- The fruit weigh approximately 1kg with an average of 20-22 fruits per meter

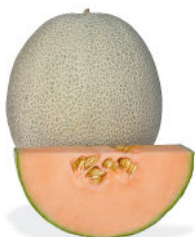

Melon - Harper

Barbossa

- A hybrid Harper melon that exhibits an excellent, strong plant that produces high quality fruit.
- The fruit are round-oval in shape, firm, uniform, crisp in taste, have a small cavity, average 14 brix and 8 fruits per meter with a great taste.
- The fruit have a dark orange interior color and are excellent for domestic or export markets.

Bounty

- A harper melon that has a strong plant producing high yields, of excellent quality fruit.
- The fruit have a dark orange interior, medium closed cavity, average 14 brix, 7.9 pressure and 9-10 fruits per meter.
- Bounty is suited for the main-late season.

Brolga

- A hybrid harper melon that is boosted by its adaptability in many climates.
- The round-oval shaped fruit have a nice deep orange flesh color, with a tight cavity while averaging a brix of 13%.
- Produces large fruit that are ideal for fresh or processing markets.

Melon - Harper

Cannon

- A harper melon that produces high quality fruit with a vigorous strong plant setting 8-9 fruits per meter.
- The fruit are uniform and firm with a tight cavity, exhibit a fine net and have a bright orange flesh color, while averaging 12's in size
- Performs best going from warm-hot season.

Fantastic

- A harper melon with a strong, vigorous vine, and it produces uniform fruits with high flavor.
- This variety produces an early sugar development internally and brix can reach up to 16-18%.
- Fruits are round/round-oval that weigh on average 1.5 kg (9s & 12s)

Treasure ^{NEW}

- A harper melon with a strong plant that provides great cover to the high quality fruit.
- The fruit have a dark orange interior, tight cavity and is round in shape.
- Treasure is very productive, averaging 8-9 fruits per meter while maintaining an 14 brix.

VM18011770 ^{NEW}

- A hybrid Harper melon that exhibits an excellent, strong plant that produces high quality fruit.
- The uniform fruit are round-oval in shape and has a dark orange flesh color.
- Vigorous plant produces 8-9 fruit per meter and averages 1.5 kg (9s & 12s)

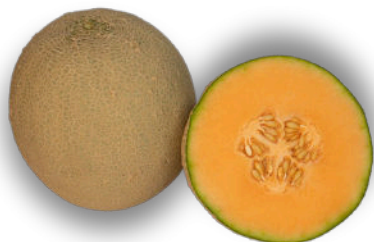

VM18015337 ^{NEW}

- A harper melon that has a strong plant producing excellent quality fruit.
- The fruit are round-oval in shape, uniform, tight cavity, average 14 brix and 8 fruits per meter with a great taste.
- The fruits have a dark orange interior color and average 1.5 kg (9s & 12s) in weight.

Melon - Harper

Zacapa Gold

- A harper melon that exhibits a strong plant that provides excellent cover and produces high quality fruit.
- The plant produces 8-10 fruits per meter and the fruit have a deep, orange internal flesh color with a tight cavity.
- Fruits are round/round-oval that weigh on average 1.5 kg (9s & 12s)

Melon - Honeydew

Catherine

- A hybrid honeydew with an attractive green flesh color, medium cavity, and superior taste.
- The fruit average 14 brix, 7lbs pressure, and the plant produces approximately 5 fruits per meter.
- This main season variety produces excellent high quality fruit on a strong plant.

Charlotte

- A hybrid high quality honeydew melon that exhibits a delicious taste.
- The plant is vigorous and strong producing approximately 7 fruits per meter.
- The fruit have a creamy exterior with a green flesh, and a small open cavity. Fruits average 13 brix and 7.6 pressure.

Flora

- A hybrid honeydew melon that has a large and vigorous plant producing high quality fruit that average 13 brix and 6.5 pressure.
- The fruit are round in shape, have a smooth creamy exterior color, and a green flesh.
- The fruit average 4's and 5's in size producing approximately 7 fruits per meter.

Grace ^{NEW}

- Our newest hybrid honeydew introduction!
- This hybrid honeydew has a vigorous plant that produces high quality fruit.
- Fruits are round/round-oval in shape and average size 4 and 5s.
- The fruits are very smooth with a creamy external color that exhibits excellent flavor.

Melon - Specialty

Lemoncello ^{NEW}

- A non-traditional harper melon that presents a unique balance between sweet and acidic flavor profile.
- The vigorous plant produces round/round-oval fruit, with a semi open net. Fruits weigh on average 1.5kgs (9s & 12s).
- This variety performs best in the cold-hot season.

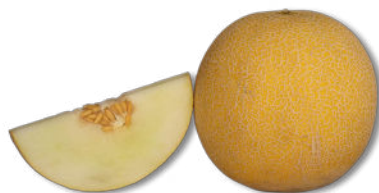

Yoshi ^{NEW}

- A hybrid Dino melon with extremely high quality flavor.
- Characterized by its large fruit size, averaging 1.8-2.2kg, and its unique light green speckles on its exterior.
- This hybrid is very early maturing, suited for early season harvest.

USAM 14816

- A hybrid yellow skin specialty honeydew melon that has a strong plant producing high quality fruit with good yield.
- The fruits skin is an attractive yellow color with a creamy internal flesh color.
- The plant produces an average of 6-7 fruits per meter and average 15-17 brix.

VM19015459 ^{NEW}

- A non-traditional hybrid Galia melon that is characterized by its sweet and tart flavor.
- The high yielding tart Galia produces round-oval fruit with a very nice, creamy flesh color. Fruits average 1.5kgs (9s & 12s).
- This hybrid is suitable for year round cultivation.

VM19015482 ^{NEW}

- A non-traditional Hybrid Galia melon that is characterized by its balance of sweet and sour.
- The round-oval fruits have creamy internal flesh color. The fruits average 1.3kgs in size (12s & 9s).
- This main season melon produces high quality fruit on a strong, vigorous plant.

Melon - Specialty

VM20012270^{NEW}

- A special harper melon that exhibits a modest golden hay colored external background when mature.
- The vigorous plant produces round-oval fruit that are uniform in shape and size. Averaging 1.4kgs in size (9s & 12s).
- This variety performs best in warm-hot seasons.

VM20012246^{NEW}

- A non-traditional harper melon that displays a moderate golden hay external background color.
- The strong plant produces uniform fruit averaging 1.2-1.3kgs in size (12s & 9s).
- The round-oval fruits average 14-16 brix when ripe.

VM24995504^{NEW}

- A Orange Flesh Honeydew that is characterized by its attractive orange flesh and its smooth, creamy external shell.
- The early maturing honeydew is very productive with the fruit size it has. Averaging 1.6-1.8kgs (9s & Jumbos 9s)
- The high quality fruit have a fantastic flavor with brix around 14-17.

Melon - Western Shipper

Kronos^{NEW}

- A hybrid Western Shipper melon that has a vigorous plant producing high quality fruit.
- The large fruit are uniform, have a tight cavity, round-oval in shape, and has an attractive orange flesh color.
- The fruit average 1.7-2kgs while maintaining a 12 brix.

Melon - Western Shipper

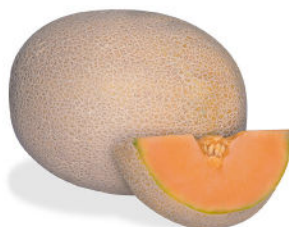

Elele

- A hybrid western shipper melon that has a strong plant producing fruit that are mostly 12's and 15's in size with 8 fruits per meter.
- The fruit are uniform, have a medium closed cavity, round shape, and a bright orange flesh color.
- The fruit average 12 brix and 6.3 pressure. Resistance: FOM2

Hemera

- A hybrid western shipper melon with a strong vigorous plant that has good cover.
- This variety produces uniform, round shaped fruit that consist of 9's and 12's in size.
- The fruits have an attractive orange flesh, heavy netting, small cavity, and exceptional brix of 12 with 8 melons per meter.

Guerrero

- A hybrid western shipper melon that has a strong plant with exceptional flavor.
- It will produce fruit that are mostly 6's and 9's in size and average 6 melons per meter.
- The fruits are uniform, round-oval in shape, medium closed cavity, exhibit an excellent aroma, average 12 brix, and 4.5 pressure.

Thanos ^{NEW}

- A hybrid western shipper melon that is boosted by its vigorous plant and large fruit size.
- The fruits are uniform are round-oval in shape with a beautiful orange flesh color.
- The large melons average 3-3.5kgs in size and maintain a 12 brix.

Titan

- A hybrid western shipper melon that has a vigorous plant producing high quality fruit.
- The fruit are uniform, have an orange flesh color, are aromatic, average 11 brix and 4.5 pressure.
- Produces high quality fruit that average 9's and 12's in size and 9 melons per meter.

Hot Pepper - Anaheim

Brangus

- A hybrid hot Anaheim pepper that exhibits a compact-medium plant which produces high yields of excellent quality peppers.
- The fruits are 20x4.6cm (7.8x1.8in) in size, have thick walls, and the medium-dark green color fruit matures to red color.
- Disease resistance: TSWV

Charger

- A market leader in the hybrid Anaheim category with its large size and high yield potential.
- This main season variety has an erect, vigorous plant with excellent foliage cover for fruit protection.
- The fruit is smooth, typically two lobed, with thick flesh and mild pungency. The fruit measures 20x4cm (7.8x1.5 in).
- Disease resistance: TSWV

Lambo

- A hybrid Anaheim pepper with a medium-large plant that has large leaves providing excellent cover.
- This variety has high yielding potential, while the fruit exhibit a tapered traditional shape, medium green to red in color and has thick walls.
- The uniform, smooth fruit average 20x4cm (7.8x1.5in) in size.
- Disease resistance: Xcv 1-3, TSWV

Rubicon

- A hybrid Anaheim pepper that displays a strong plant that is high yielding.
- The fruits are 21x4.6cm (8.2x1.8in) in size, have thick walls, are tapered in shape, and matures during main season.
- Disease resistance: Xcv 1-3

Hot Pepper - Ancho

Mascota ^{NEW}

- Our new, high quality Ancho pepper with two smooth veins and a flat uniform shape.
- It produces higher yields per plant during first harvest, with a 30-40% extra dry weight for processing.
- The fruit averages 19x8cm (7.5x3in), and the fruits mature to a beautiful red color.
- Disease tolerance: Xcv 1-3

Masivo

- A hybrid ancho that produces high quality peppers with two smooth veins and a flat uniform shape.
- The dark green, extra large fruit, set Masivo aside from the competition.
- Fruit averages 19x8cm (7.5x3in) with a Scoville rating of 1500-4000.
- Disease resistance: TMV

VP19090431 ^{NEW}

- A hybrid Ancho that has a vigorous plant producing dark green fruit that mature to chocolate in color.
- The high yielding Ancho produces quality fruit that are two lobed and thick walled.
- The fruit mature during main season, and average 17x8cm (7x3.5in) in length.

USAP 10164

- A hybrid Ancho pepper that produces high quality fruit while maintaining a medium compact plant.
- It produces quality, two lobed fruit that is smooth and very attractive.
- The fruit will turn from green to a beautiful chocolate color, when fully mature and average 17x8cm (7x3.5in) in length.

USAP 10168

- A hybrid hot ancho pepper that has a medium to large plant and produces uniform, high quality fruit.
- The fruit mature from green to red in color, are firm, mostly two lobed, average 7x3in in size, and mature during main season.
- Disease resistance: Xcv 1-3

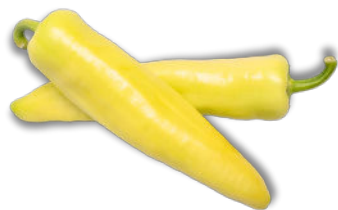

Hot Pepper - Banana

Blazing Banana

- A hybrid Hot Banana that has an attractive, creamy yellow fruit color, and early maturing.
- The vigorous plant produces a concentrated fruit set of medium to large fruits, with thick walls and averages 18x3.5cm (7x1.3in).
- It is noted for its excellent yield potential and can be used in both fresh market and processing.

VP20090321 ^{NEW}

- A hybrid Hot Banana that is exhibited by its vigorous plant and high yield.
- The fruit set consist of medium to large fruits, with thick walls and averages 23x4 cm (9x1.5 in).
- The creamy yellow fruit are two veined and are tapered in shape.

VP20090325 ^{NEW}

- A hybrid Hot Banana which produces medium to large fruit that are of a creamy yellow color.
- The vigorous plant produces a high yield of uniform fruit that are thick walled and average 23x4 cm (9x1.5 in).
- It is noted for its excellent yield potential and can be used in both fresh market and processing.

Hot Pepper - Caribe

Rio Tesoro

- A hybrid Caribe type that produces attractive high quality fruit that is characterized by its broad shoulder and thick walls.
- Creamy yellow in color and turning a brilliant orange to red when mature and average 8.5x5 cm (3.5x2in) in length.
- This variety is widely adapted to a range of growing regions.

Yellowstone

- A hybrid, jumbo, high yielding Caribe type pepper that exhibits a large plant which produces excellent quality fruit.
- The fruits are bright yellow in color and mature into a vibrant orange to red color.
- The fruit are large sized averaging 10.5x6cm (4.5x) in length and mature during main season.

Hot Pepper - Cayenne

Big Horn

- A hybrid Cayenne pepper that has a vigorous plant producing high quality, long, thick fruits that have an excellent flavor and taste.
- The fruits are 22.8x5.0cm (9x2in) in size, cylindrical and long in shape and turns from green to bright red in color.
- This is a multiuse pepper and can be used in fresh and processing markets.

Hot Pepper - Cubanelle

Bahama Gold

- A hybrid cubanelle pepper that shows strong resistance and a strong compact plant.
- The large to extra-large fruit are smooth with a narrow shoulder cavity showing excellent quality.
- The plant exhibits excellent cover and produces high yields of long tapered peppers.
- Disease resistance: Xcv 1-3

Hot Pepper - Habanero

Rey Kawiil

- A hybrid red habanero that has a vigorous plant producing high yields with prolonged harvest.
- The uniform plant produces fruits that are medium bright red in color, have a traditional shape, and average 4.5-5cm (1.7-2in) in size.
- The fruit are very pungent, aromatic, and have a Scoville rating of 200,000.

Rey Pakal

- A hybrid habanero with a vigorous plant that provides for prolonged, high yielding harvests.
- The uniform fruits reach maturity at 136 days and are large in size, averaging 4.5-5cm (1.7-2in).
- The mature fruit are a medium-dark red in color, aromatic, and extremely hot with a Scoville rating of 200,000.

Hot Pepper - Habanero

Chitam

- Chitam adds a distinctive color to our product line as a chocolate habanero.
- A vigorous hybrid habanero with a healthy plant that gives growers a continuous fruit set throughout harvest.
- Fruit are uniform and averages 4-5cm (1.5-2in) in size with a typical habanero shape.

Kabal

- A high yielding orange hybrid habanero to compliment the US Agriseeds product line.
- Size averages 4-5cm (1.5-2in) with a typical habanero shape with an average scoville rating of 200,000.
- Boasting a vigorous hybrid with a healthy plant that gives growers a continuous fruit set throughout harvest.

Rey Akul

- A hybrid habanero that has a very beautiful orange color with the traditional habanero shape.
- Vigorous plant with excellent cover that produces fruit that matures to a vibrant orange color and averages 4.5-5cm (1.7-2in) in size.
- This highly adaptable pepper can be grown open field or under low tech greenhouses.

Rey Kaan

- A hybrid habanero that has a vigorous plant which produces high quality, high yielding bright orange colored fruit.
- The fruit are a traditional shape, average 4-5cm (1.5-2in) in size.
- This variety has a distinctive habanero flavor and is very adaptable while maintaining a 200,000 scoville rating.

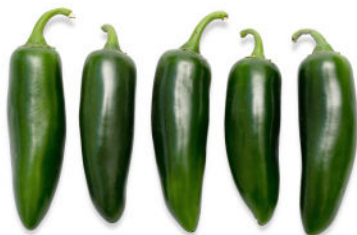

Rey Votan

- An orange hybrid habanero that matures during main season and produces abundant fruit sets with multiple fruits per axil.
- The fruits are very uniform and averaging a size of 4-4.5cm (1.6-2in).
- The uniform compact plant provides excellent cover for its high quality fruit.

Hot Pepper - Jalapeño

Jedi

- A hybrid jalapeño that combines jumbo fruit size with main season maturity while exhibiting outstanding quality.
- The fruits average 10x4 cm (3.5x1.5 in) in size, and the vigorous plant provides a continuous set that allows for an extended pick.
- Widely adaptable making this variety an excellent choice for the many difficult markets.
- Disease resistance: Xcv 1-3

Lexus

- A main season jumbo hybrid jalapeño that has an excellent yield and high fruit quality.
- It has an average size of 10x4 cm (3.5x1.5 in), while the medium plant produces multiple branches and provides a concentrated set.
- Widely adapted and is ideal for both fresh and processing markets.
- Disease resistance: Xcv 1-3

Lince

- A hot pepper jalapeño hybrid, its fruits are very cylindrical in shape and boost a strong vigorous plant.
- The fruits are large (80% jumbo) and very uniform, while maintaining a high pungency level.
- The large, vigorous plant produces great cover for its quality fruit.
- Disease resistance: Xcv 1-3

Lion

- A high yielding jalapeño hybrid that exhibits a strong plant with great cover.
- The fruits are dark green in color, average 4-4.7in (10-12cm) in size, and is very cylindrical and firm.
- The high quality fruit are ideally grown during the main season and produce fruit suitable for fresh market.

Mammoth

- A hybrid hot jalapeño that produces high quality, uniform, and dark green fruit making it ideal for fresh and processing markets.
- This jalapeño's superior yields compliments its excellent fruit quality, and averages 13x5cm (5x2in) with a scoville rating of 3000-5000.
- The uniform fruit set provides for an extended harvest period.
- Disease resistance: TMV, PVY

Hot Pepper - Jalapeño

Pantera

- A hybrid Jalapeño that has a vigorous plant that produces fruit ideally for fresh market. It has a very vigorous plant and strong stems.
- The plant has very good regrowth and continuous set for consecutive harvests for a long period of time.
- Fruit sizes are mostly jumbo with some large ranging from 3.7-4.2in (9.5-10.5cm) long and it presents almost no cracking.
- Disease resistance: Xcv 1-3

VP19090011 ^{NEW}

- A hybrid Jalapeño that is portrayed by its vigorous plant that produces uniform large fruit.
- The jumbo to large fruit are dark green in color and average 4.5in (11-12cm) in length and it presents almost no cracking.
- Disease resistance: Xcv 1-3

Ring Maxx

- A hybrid Jalapeño pepper with a vigorous plant that has an excellent yield of smooth, dark green, long cylindrical fruit.
- The long cylindrical 4-5.5x1in (12cm) fruit produce extra slices with each pepper and have almost no cracking at harvest.
- The cylindrical fruit has thick walls that destem easily and are great for processing and slicing nacho rings. Disease resistance: Xcv 1-3

Trickster

- A hybrid No-Heat Jalapeño that has a medium to large plant that produces fruit that are extra large.
- The fruits are firm, uniform, cylindrical in shape, dark green in color, have thick walls and mature during main season.
- The extra large fruit that average 3.75-4.5in (9.5-11cm) in size.
- Disease Resistance: Xcv 1-3

VP20090061 ^{NEW}

- A hybrid Jalapeño that is suited for the processing market such as whole canned.
- The dark green fruits are firm, uniform and thick walled.
- The highly productive plant produces fruits that average 3x1in (7.6x2.5cm) in size.
- Disease Resistance: Xcv 1-3

Hot Pepper - Jalapeño

VP20090101^{NEW}

- A hybrid Jalapeño that is suited for the processing market such as whole canned.
- The dark green fruits are firm, uniform and thick walled.
- The vigorous plant produces beautiful fruits that average 3x1in (7.6x2.5cm) in size.
- Disease Resistance: Xcv 1-3

Hot Pepper - Serrano

Altiplano

- A hybrid Serrano that is widely adaptable with a vigorous plant and main season maturity.
- The fruit are jumbo in size averaging 13x1.27cm (5.1x.5in) and are a uniform, dark green color.
- Quickly becoming a market leader due to its excellent fruit quality and high yield potential.

Santo Domingo

- A hybrid jumbo Serrano that has a compact-medium plant and main season maturity showing excellent uniformity.
- The fruit's average 12.7x1.5cm (5x.6in) and are uniform, glossy green color, cylindrical, and firm.
- Its noted for its high yielding potential of large size fruit, while being widely adaptable.

VP19090454^{NEW}

- A hybrid Serrano that has a compact plant and adaptable to diverse climates.
- The attractive, uniform fruit's average 12.5x1.5cm (5x0.5in) and are glossy green in color.
- The high yielding potential is boosted by the strong stems to hold the large yeild.

Hot Pepper - Fresno

Ruby

- A hybrid Fresno type pepper that produce very tasty fruits that reach an average of 2,500-10,000 Scovilles.
- Fresno peppers mature from green to red as they grow, and increase in hotness, but are often harvested and sold green.
- Fruits are approximately 2.5x1 inch diameter.

Sweet Pepper - Banana

Goddess

- A hybrid sweet banana pepper that is early maturing with a strong plant producing tremendous yields.
- The plant produces a heavy fruit set of large fruit that measures 22.8x4.5cm (9x1.75in) in size, and is very sweet.
- The attractive, straight, glossy yellow fruit has smooth skin and is ideal for processing and fresh market. Disease resistance: Xcv 1-3

Godiva

- A hybrid sweet banana pepper that boasts a very strong plant with great yield potential.
- The large fruit average 22.8x4.5cm (9x1.75in) in size and are uniform with a glossy yellow color.
- Adaptable to fresh and processing markets while maintaining its high quality.
- Disease resistance: Xcv 1-3, TSWV

Sweet Pepper - Bell (Green - Red)

VP23060721 ^{NEW}

- A hybrid bell pepper that turns from green to red in color and is suitable for open field production.
- The blocky fruits are very uniform, firm and thick walled.
- Averages 12.5x11.5cm (5.2x4.6in) in size, and the plant has excellent leaf cover.
- Disease Resistances: Xcv 1-10, TSWV, L4

VP23060722 ^{NEW}

- A hybrid bell pepper that turns from green to red in color and is suitable for open field production.
- The excellent plant produces fruit that averages 12.5x11.5cm (5.2x4.6in) in size.
- The blocky fruits are very uniform, firm and thick walled.
- Disease Resistances: Xcv 1-10, TSWV, L4

Sweet Pepper - Italian

Catania

- A hybrid Italian pepper that has a vigorous plant habit and is high yielding.
- The uniform fruits are straight and are approximately 227 grams in weight and 25x5cm (9.8x2in) in size.
- The fruits mature from green to deep glossy red and is an excellent addition for fresh market and processing.

Sweet Delilah

- A hybrid Marconi pepper that has a vigorous plant habit, and early-main season maturity.
- The uniform fruits are mostly three lobed, averaging 22.8x6.4cm (9x2.5in) with tapering to a blunt end.
- The fruit matures from green to deep red and is adaptable for either fresh market or processing markets.

Squash - Bulby

Darling

- A hybrid Bulby squash with excellent high quality fruit that are dark green in color.
- This variety is noted for its strong plant with high yields with an extended harvesting period.
- Fruits are high quality, approximately 12-15cm (4.7-5.5in) in length, and adapted for year round crop cycles.

VS18014034 ^{NEW}

- A hybrid Bulby squash with a vigorous plant that produces high quality, high yielding early main season fruit.
- The fruits are uniform, have good flower attachment and dark green with white speckles.
- The open plant promotes an extended harvest period.
- Disease Resistance: CMV, WMV, ZYMV, PRSV

VS18014049 ^{NEW}

- A very strong vigorous plant characterized by its earliness and its extremely high yield.
- Fruits are 14cm (5.5in) long, greenish white to grayish green in color, with distinctive speckles.
- Adapted for year around cultivation.
- Disease Resistance: WMV, ZYMV, PRSV

Squash - Semi Bulby

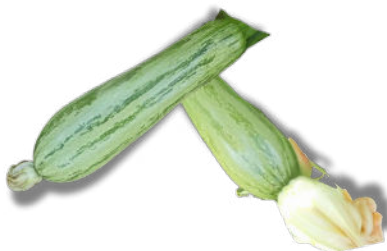

VS18014030^{NEW}

- A hybrid Bulby squash with high quality fruit that is high yielding.
- The fruit is characterized by its semi-bulbous fruit shape with glossy green color.
- Fruits are approximately 12.5x5cm (5X2in) in size, has an early to main season maturity and produces well under heat stress.
- Disease resistance: CMV, WMV, ZYMV, PRSV

Squash - Caserta

VS19014141^{NEW}

- A hybrid Caserta squash that has a medium to compact plant that produce cylindrical light green squash that have dark green stripes.
- Fruit is approximately 18x4cm (7x1.5in) in size.
- Exhibits great uniformity, very good flower attachment, and high yield.
- Disease resistance: CMV, WMV, ZYMV, PRSV

Squash - Cylindrical

USAS 10923

- A hybrid cylindrical squash that has a vigorous plant and early-main season maturity.
- The fruit are 11x3cm (4.3x1.9in) in size, and exhibit a green color with white speckles.
- Exhibits great uniformity, very good flower attachment, and high yield.
- Disease resistance: ZYMV, WMV

Pars

- A hybrid, Cylindrical squash with an open plant, uniform fruit, and glossy green color that makes this variety very desirable.
- The fruit's mature early to main season and average approximately 13.5x2.57cm (5.3x1.4in) in size.
- Disease Resistances: ZYMV, WMV

U-Turn

- A hybrid Cylindrical squash with a vigorous plant that matures in the early to main season.
- The fruit are dark green with white flecking, uniform, very high yielding and 12.5x2.6cm (4.9x1.5in) in size.
- Disease Resistances: ZYMV, WMV

Squash - Cylindrical

USAS 21003

- An excellent high quality hybrid cylindrical squash with a vigorous plant that provides excellent cover.
- The fruit is characterized by its medium to long length, 15.5x2.7cm (6.1x1in) with a straight, cylindrical shape.
- The variety has a good green colored skin with light speckling.

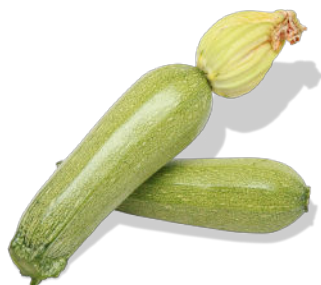

Squash - Grey Zucchini

Luciana

- A hybrid grey zucchini that is characterized by its excellent disease package, and true characteristics of a grey zucchini.
- Early maturing with a strong, open plant habit contributing to ease of harvest.
- The high quality fruit and exceptional yield make it a standout against the competition. Disease Resistance: CMV, ZYMV, WMV, PRSV, IR: Px

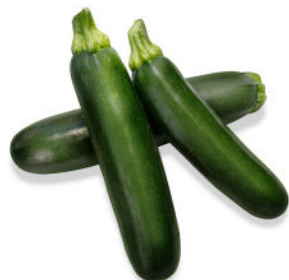

Conquistador

- A hybrid grey zucchini that is early maturing with a strong, open plant habit contributing to ease of harvest.
- The high-quality fruit and exceptional yield make and a standout among the competition.
- Fruits average 13x4cm (5x2in) in size with a semi-bulbous shape.
- Disease Resistance: PRSV, WMV, ZYMV

Squash - Green Zucchini

Liberty

- A hybrid, dark green zucchini that has the combined attributes of a strong, open, and spineless plant.
- The attractive glossy fruit maintain a cylindrical shape and twist off easily at maturity.
- The open plant promotes an ease of picking and less damage fruit at harvest. Disease Resistances: ZYMV, IR: PRSV, WMV

Endurance ^{NEW}

- A hybrid zucchini that is very productive and exhibits an open, spineless plant, promoting less damage during harvest .
- Produces high quality, dark green, cylindrical, uniform fruit with a glossy fresh appearance.
- Widely adaptable to many growing regions.
- Disease Resistance: WMV, ZYMV, CMV

Tomato - Determinate Heirloom

Canadian Beefsteak

- A determinate round heirloom tomato that produces fruit of excellent quality.
- The fruit are oblate in shape, medium red in color, have a small blossom scar and average 200-230 grams in size.
- Has excellent flavor profiles and a very balanced, sweet taste.

Black Velvet

- A determinate heirloom that exhibits a dark rich color, high flavor and good yield.
- This chocolate colored tomato has a medium plant that produces fruit that weigh 130-170 grams and mature during main season.
- The intense color makes this variety unique.

Tomato - Determinate Round

Rafah

- A hybrid Determinate Round that produces high quality fruit with excellent yield potential.
- This variety produces a high yield of uniform, firm and medium-large sized fruit that average 170-190 grams.
- Disease Resistance: F1, F2, TMV, TYLCV, V, N

Tomato - Determinate Saladette

Rubeus

- A Determinate Saladette hybrid with a strong plant and great foliage cover.
- Fruits are large and extra-large size (130-160g), oval blocky in shape, very firm, deep red color, and high yield.
- Disease resistance: F2, TYLCV, TSWV, TMV, SM, Va

Rufus

- A Determinate Saladette hybrid with a strong plant that grows fruits of an intense red color.
- This high yielding plant produces fruits that are long blocky in shape and weigh 120-140 grams.
- Disease resistance: F2, F3, TYLCV, TSWV

Tomato - Determinate Saladette

Rutilus

- A hybrid Determinate Saladette that has a large and vigorous plant producing high quality fruit.
- The fruit are square round in shape, uniform, firm, are deep red in color, and are approximately 145 grams in weight.
- Disease resistance: Va, F2, ToMV, IR: TYLCV.

Russell

- A hybrid Determinate Saladette tomato with a strong plant and good crown set.
- Fruits have a nice deep red color and average 8x6cm in size with a blocky elongated shape.
- Disease resistance: SM, F2, F3, TSWV, Va

VT19077265 ^{NEW}

- A hybrid Determinate Saladette with early season maturity that produces very uniform fruit.
- The round-square fruits are consistently bright red in color, very firm, and produces high yields from a medium compact vine.
- Disease resistance: F1, F3, TSWV, TYLCV, SM, TM, V

Tomato - Determinate Specialty

Golden Fresh Salsa

- A Determinate Saladette that has a medium-vigorous plant that produces fruit of high quality that have no gel.
- The fruit has a bright golden color, is firm, uniform, blocky shape, high yielding, and weighs 120-130 grams.
- The flavor and no gel flesh make it an excellent variety for fresh and processing markets.

Golden Girl

- A Determinate Grape tomato that has a medium plant and is very productive.
- Fruits are oval in shape, has a bright golden color, uniform, firm and is early maturing.
- Fruits average 9-11 grams in size and have excellent taste.

Tomato - Determinate Specialty

Jolly Girl

- A strong determinate plant with early maturing red grape tomatoes weighing 10-13 grams.
- The tomatoes resist cracking on the vine under normal growing conditions.
- This variety produces flavorful grape tomatoes with a long shelf life and high yield potential.

San Marzano Golden

- A specialty Determinate Saladette tomato that has a medium plant that produces high quality fruit.
- Fruits are elongated in shape, firm, golden in color, and weigh 130-150 grams.
- Great variety for processing or fresh markets.
- Disease Resistance: F2, Va

Tangerine Slicer

- A Determinate Round hybrid that is noted for its no gel characteristic, medium vine, and it is high yielding.
- This variety produces uniform, and firm tomatoes that are bright tangerine in color.
- The fruit weigh approximately 150-190 grams and is preferably grown during the main season. Disease resistances: Va

Golden Roma

- A Determinate processing tomato has a vigorous vine that produces high yields of excellent quality fruit.
- The fruit are square round in shape, bright yellow in color, and have an average pH of 4.35 with a brix of 4.3
- This variety is suitable for fresh and processing markets.

Pink Cherry

- A specialty Determinate Cherry tomato that has a medium plant producing a concentrated set of attractive, and beautiful pink tomatoes.
- The fruit are 15-20 grams in size, firm, uniform, round in shape, and high yielding.
- Great variety for fresh market and home gardens.

Tomato - Indeterminate Cherry

Chocolate Cherry

- An Indeterminate Cherry tomato with a strong plant with excellent uniformity and great high yielding potential.
- The unique fruit are consistent with its excellent taste and flavor.
- This variety is firm, weighs 9-11 grams and is ideal for the main season.

Red Zebra Cherry

- An Indeterminate Cherry tomato that exhibits a unique brilliant color with excellent flavor.
- The high yielding plant produces high quality fruit that are 10-12 grams in weight.
- This variety produces uniquely patterned fruit that are firm, uniform, and round in shape.

Buttercream

- An Indeterminate Cherry tomato that has a medium plant that produces very high quality fruit.
- The fruit are round in shape, creamy in color, and have excellent firmness.
- Fruits on average weigh between 20-25 grams and have excellent flavor.

Tomato - Indeterminate Grape

Honey Bunch Red

- An Indeterminate Grape that has ultra-sweet taste and a good firm texture.
- The plant is medium and produces high yields of excellent quality fruit.
- The fruit are 8-11 grams in weight, have an oblong shape, are bright red in color, and mature during main season.

Lucia

- An Indeterminate Grape tomato that has an excellent flavor with high brix.
- This variety is firm, super crunchy, bright red in color, and weighs approximately 6-8 grams.
- Lucia is high yielding and has very high quality.

Tomato - Indeterminate Grape

USAT 425 - Pink

- An Indeterminate Grape that exhibits a brilliant pink color, with tolerance to cracking.
- The high yielding, firm fruits set well under high and low temperatures.
- An early variety that weighs 15-20 grams and has an average brix of 7.8.

Tangerine Grape

- An Indeterminate Grape that exhibits a medium plant that produces high quality fruit.
- The fruits are uniform, tangerine in color and matures during the early to main season.
- This variety is firm, weighs 9-11 grams and has excellent flavor.

Honey Bunch Yellow

- An Indeterminate Grape tomato that has a medium vigorous plant and produces an abundant amount of high flavor grape tomatoes.
- The fruits are oval in shape, firm, yellow in color, uniform, 8 brix average, and weigh approximately 8-10 grams.
- This variety can be grown in open field and greenhouse environments.
- Disease Resistance: F2, Va

Yellow Grape

- An Indeterminate Grape tomato that have excellent flavor with high brix.
- The plant is medium and produces high yields of excellent quality fruit.
- The very strong plant, with fruit that is uniform in shape and fruit size 8-12 grams and also perfect for snacking.

Samurai

- An Indeterminate Grape tomato that exhibits high quality fruit on a medium-vigorous plant.
- Fruits average approximately 6-10 grams in fruit weight, are bright red in color, firm and very sweet.
- This variety can be grown in open field and greenhouse environments.

Tomato - Indeterminate Heirloom

American Beefsteak

- A very attractive Indeterminate Heirloom tomato.
- The uniform fruit average 170-230 grams per tomato with a very nice shape.
- The fruit has a meaty flesh with a delicious heirloom flavor.

Jersey Beefsteak

- An Indeterminate Heirloom tomato with a great high flavor profile.
- The plant produces uniform, firm and high quality fruit and is suitable for spring, summer and autumn plantings.
- The fruits weigh on average 250 grams and are bright red in color.

Pineapple

- An Indeterminate Beefsteak tomato that exhibits a very unique bright yellow with red striped color pattern.
- The classic heirloom shapes add an exquisite bright color to any heirloom pack.
- The fruit weighs on average 280-300 grams, has a high brix, and has excellent flavor.

Tomato - Indeterminate Plum

Amur - Chocolate Zebra

- An Indeterminate Plum that is noted for its bright zebra stripe color pattern.
- The plant has short internodes and is very productive, producing very uniform fruit size averaging 35 grams.
- Has excellent flavor profiles and a very balanced, sweet taste.
- Disease resistance: Va, Vd, Fol, TMV; **IR:** Ma, Mi, Mj

Orange Sunshine

- An Indeterminate Plum tomato that has a medium plant and is very productive.
- The high yielding plant produces quality fruit that average 20-25 grams in weight.
- When mature, this variety turns to a beautiful tangerine color.

Tomato - Indeterminate Saladette

Natalie

- A hybrid Indeterminate saladette with an excellent disease resistance package, outstanding quality and high yield.
- The plant is vigorous, has short internodes, and is main-late season maturity.
- The fruit have a bright red color, long blocky shape, and are very firm.
- Disease Resistance: F1, F2, F3, Va, TSWV, TYLCV, V

San Marzano

- This variety has genetics from the classic Italian heirloom.
- The uniform fruits weigh on average 110 grams per tomato and have a classic elongated shape.
- Suited for main season production.

USAT 9934

- A hybrid Indeterminate early season Saladette characterized by a medium plant vine with open foliage.
- The plant has short cluster internodes that produce high quality, extra large fruit that are approximately 140-160 grams.
- Adaptable to various growing environments.
- Disease Resistance: F2 & BSK

USAT 12227

- A main season hybrid with a strong, medium plant vine, and good cover that produces a heavy fruit set per cluster.
- The fruit are square-elongated in shape, firm, very uniform, and extra large in size, approximately 150-170 grams.
- Very hearty variety for extended production.
- Disease Resistance: F2 & BSK

USAT 17214 ^{NEW}

- A hybrid Indeterminate tomato Saladette, with a vigorous plant and excellent coverage.
- The extra large fruits weigh, on average, 150 grams, while maintaining its oval elongated shape.
- Disease Resistance: Asc, Va, F2, F3, TSWV

Tomato - Indeterminate Saladette

USAT 17215 ^{NEW}

- An Indeterminate Saladette tomato hybrid that shows a plant of regular vigor and foliage coverage.
- The uniform fruit are very firm while boosting excellent fruit ripening quality.
- On average the fruits will weigh between 140-160 grams.
- Disease Resistances: F3, Sm, Sw5, Va, Tm2a, TYLCV

Tomato - Indeterminate Small Pear

Red Pear

- An Indeterminate Pear that exhibits excellent quality and is high yielding.
- The fruit are a bright red color, firm, uniform, and weigh approximately 6-8 grams, with a brix rating of 8-10.
- It has an excellent shelf life and does not become translucent immediately after harvest. Disease Resistance: BSK

Yellow Pear

- An indeterminate pear that boost a high yielding potential and maintaining its excellent quality.
- The brilliant yellow fruits are firm, uniform, and weigh approximately 6-8 grams.
- Excellent post harvest shelf life. Disease Resistance: BSK

Tomato - Indeterminate Small Specialty

Chocolate Cherry Plum

- An Indeterminate Plum that has a deep dark chocolate/brown color.
- The vigorous plant produces a high yield of high quality fruit.
- The fruits weigh between 6-8 grams and have a sweet flavor profile.

Tomato - Indeterminate Round

Pink Lady

- An Indeterminate Round tomato that is characterized by its bright pink color, that has a unique meaty taste with excellent flavor.
- The uniform fruit average 170-230 grams per tomato with a very nice shape.
- The fruit are firm, uniform, and an oblate shape.

USAT 0259

- A hybrid Indeterminate Round that produces high quality fruit with excellent yield potential.
- The very firm, uniform fruit is noted for its globe shape, pink color and large size weighing approximately 220 grams.
- Disease Resistance: Va, C, BST and F2

USAT 14415

- A hybrid Indeterminate Round tomato that has a medium plant that produces high yields.
- The fruits are firm, uniform, have thick walls, are a deep red color, globe shaped, and weigh 260 grams.
- Disease Resistance: ASC, F2; **IR:** TSWV, TMV, Va

Valley Girl

- An Indeterminate small round tomato that is very sweet and full of flavor.
- The uniform fruit average 110-130 grams per tomato with a very nice shape.
- The fruit are very uniform, high yielding, and medium red in color.

Tomatillo

Pancho

- An intense bright green tomatillo that is traditionally used for fresh market.
- The plant is semi-sprawling and produces fruit that weigh 50-70 grams in size.
- This variety is spherical in shape, medium in size, and matures during main season.

Watermelon - Diploid All Sweet

Sweet Passion

- A Diploid All Sweet watermelon that has a strong plant producing high quality fruit.
- The fruit are oval-elongated in shape, have a bright red flesh, and a nice traditional All Sweet exterior.
- The weight of the fruit average 13-15kgs and maintain a brix of 12%.

VW18012039

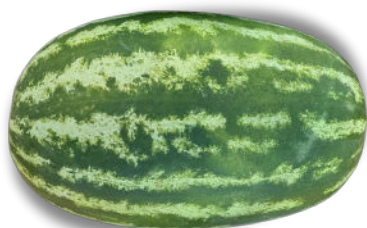

- A true All Sweet Diploid watermelon that has a vigorous plant with excellent fruit coverage.
- The uniform fruit shapes are blocky elongated with the traditional external rind pattern.
- High yielding and fast maturing variety that has good field holding potential, fruit sizes range from 15-16kgs.

VW18012081 ^{NEW}

- An All Sweet Diploid watermelon that boast a vigorous plant that produces high yields of fruits.
- The fruits are blocky elongated in shape with a slightly thicker external rind pattern than other All Sweets.
- The uniform fruits average 13-16kgs in weight and have an excellent field holding ability.

VW18012137 ^{NEW}

- An All Sweet Diploid watermelon that that has a medium vigorous plant producing high quality fruit.
- The fruits are oval elongated in shape, have a bright red flesh, and average 12 brix with excellent flavor.
- The fruits average 14-16kgs in weight and have a great field holding ability.

VW18012267 ^{NEW}

- An All Sweet Diploid watermelon with uniform oval elongated fruit that exhibit good field holding.
- The vigorous plant provide ample cover for the large size fruit that average 15-16kgs.
- The uniform fruits have a bright red flesh color with an average of 11 brix.

Watermelon - Diploid Sugar Baby

Sweet Punch

- A diploid sugar baby that exhibits high quality fruit with a dark black, smooth exterior rind.
- The medium plant produces fruit that have a bright red interior, are uniform, round in shape, and average 21.5x19cm in size.
- This versatile variety will average 13 brix and work as a pollinator or for fresh market.

Sweet Flash

- A hybrid diploid sugar baby that exhibits a medium plant producing high quality, dark black, and smooth fruit.
- The plant will produce on average 4-5 fruits per meter, the fruits are uniform, bright red flesh color, and high quality.
- The high quality fruit will average 13 brix and maintain a size of 22x20cm.

Watermelon - Diploid Tiger Stripe

Sweet Dream

- A Diploid Personal Tiger Stripe watermelon that can be used as a pollinator for all seedless watermelon.
